Dragonflies and Damselflies: Guardians of our Wetlands and Creeks

Tuesday, February 23 at 7 pm

Register at: <https://queensu.zoom.us/meeting/register/tJcld-mpqDouG9ajFO-xPZwRu5pUQh7MrMix>

Dragonflies and damselflies are beautiful and truly fascinating creatures! From the Ebony Jewelwing to the Stygian Shadowdragon, these insects are an important part of our ecosystem. Colin Jones will present a photographic narrative on the dragonflies and damselflies of Ontario highlighting their intriguing life cycle, habitats, and approaches to their conservation.

Citizen Science

Discover the many citizen science initiatives you can engage in to report your own records of dragonflies and other insects.

Colin Jones is a lifelong naturalist and the Provincial Arthropod Zoologist at the Natural Heritage Information Centre, MNR in Peterborough. He is coordinator of the Ontario Odonata Atlas project and co-author of “*A Field Guide to the Dragonflies and Damselflies of Algonquin Provincial Park and Surrounding Area.*”
