

**Tuesday, June 8th at 7 pm**  
**Spring into Summer with**  
**“An upTICK on Ticks and Lyme Disease in Eastern Ontario”**

ONTARIO  
VETERINARY COLLEGE  
DEPARTMENT OF BIOMEDICAL SCIENCES

**Featuring -**

**Dr. Andrew Peregrine, Professor and Clinical Parasitologist at the Ontario Veterinary College, University of Guelph, whose research interests include infections in animals and people.**

- Slideshow and talk on the recent research on the increase of Ticks across Eastern Ontario
- How to identify the “bad guys” from the “benign ones” and strategies on avoiding and safely removing Ticks
- Discussion on Lyme Disease in dogs and people and helpful resources if you are impacted by Lyme Disease
- What you can do to reduce the risk of Lyme Disease

**Online Winter Speaker Series 2021**

Free via Zoom. Series hosted by the Friends of the Napanee & Salmon Rivers  
**Register** at [www.FriendsNapaneeRiver.ca](http://www.FriendsNapaneeRiver.ca)  
or contact [info@FriendsNapaneeRiver.ca](mailto:info@FriendsNapaneeRiver.ca)

Dr. Peregrine will summarize the current research on the emergence of ticks in this area, including how climate change and wildlife movement fit into the picture, and an overview of Lyme disease.

Learn about the relevant kinds of ticks in Ontario, how to identify the “bad guys” from the benign ticks, and how to safely remove a tick. See the research data on how the risk of exposure to this organism is changing. Learn about the disease in dogs and people, plus strategies to reduce the risk of infection.

The event is free, via Zoom, and will be available on a YouTube link afterward. Please register in advance at [www.FriendsNapaneeRiver.ca](http://www.FriendsNapaneeRiver.ca) under the NEWS tab. For more information, contact [info@FriendsNapaneeRiver.ca](mailto:info@FriendsNapaneeRiver.ca)
